

ZIKA REPORTING

This page contains links to reports written by the New Hampshire Department of Health and Human Services (NH DHHS), the Centers for Disease Control and Prevention (CDC), and the World Health Organization (WHO). The information is technical in nature and contains contents on human case surveillance as well as mosquito surveillance for Zika virus.

By law, healthcare providers are required to report suspected or confirmed cases of any notifiable condition. Notifiable conditions include infectious diseases that pose a risk to public health, such as Zika virus. Additional information about reporting is located on the NH DHHS website (<https://www.dhhs.nh.gov/dphs/cdcs/forms.htm>).

New Hampshire Reporting

New Hampshire Zika Reporting information can be found at the following link: <https://www.dhhs.nh.gov/dphs/cdcs/zika/>

Federal Reporting

CDC Zika Virus Reporting and Surveillance

This page provides information on U.S. Zika Virus surveillance and reporting by the CDC. The CDC provides information on cases reported in the U.S. and U.S. territories by year; cases of Zika in U.S. pregnant women; pregnancy outcomes in the U.S.; and birth defects surveillance. Information can be found by visiting the following webpage: <https://www.cdc.gov/zika/reporting/index.html>

International Reporting

World Health Organization Zika Virus Situation Reports February 2016 - March 2017

This page includes the WHO Situation Reports for Zika virus. This information can be helpful in understanding the evolution of international Zika Virus surveillance and response as it emerged as a global health concern. This data has now been archived. Current updates are available at the following link:
